Spray Solvent Systems

Plating Development Systems

# BY CLASSONE TECHNOLOGY.

## Proud of what we do. Proud to do it here...

Born and bred in Kalispell, ClassOne Technology designs and builds advanced semiconductor wet processing equipment. But unlike the larger equipment makers who focus mainly on selling the biggest, most expensive systems to the biggest users, we focus on *everyone else*. We deliver advanced performance systems at much more affordable prices.

Our motto sums up what ClassOne is all about: *"Advanced Wet Processing Systems for the Rest of Us!"*

## We're growing fast. And we're hiring...

The industry seems to appreciate what we're doing because the orders have been coming in as fast as we can manufacture! So, we're expanding, and we're constantly looking for smart, talented people to join our smart and talented team. If that sounds like you, please send us your resume right away, because we're hiring now! Just email it to [careers@classone.com](mailto:careers@classone.com). We look forward to hearing from you!

ClassOne Technology, 109 Cooperative Way, Kalispell, Montana 59901
